ACKNOWLEDGMENT

The preparation of this Annual Report was greatly facilitated by the dedication, competence and energy of Glenda Pickett, Secretary-Research, and untold numbers of State and Federal regulatory personnel who reviewed and revised draft submissions of the contents.

PREFACE

The 1984 Annual Report on Utility and Carrier Regulation, like the earlier ones, is a one-stop publication of pertinent information about member agencies, and covers a broad base of reference that makes this Report a virtual encyclopedia of regulatory materials. The Report is in five major parts.

Part I is presented in alphabetical order by member agencies. It includes historical data on each agency as well as the names and abbreviated biographies of the commissioners and names and titles of key staff personnel.

Part II contains two sections covering rate cases. The information is arranged in tables by type of utility and carrier. The first section summarizes utility rate cases that were under consideration by the agencies during the year. The second section contains similar information concerning transportation rate cases.

Part III is composed of national tables listing the jurisdictional, ratemaking and other general aspects of utility regulation by the State and Federal agencies.

Part IV is composed of national tables listing parallel information on State and Federal regulation of transportation.

Part V contains national tables treating miscellaneous subjects such as commissioner terms and methods of selection, agency salaries, assessment of costs of regulation, judicial review, assistance to intervenors, news media coverage, administrative law judges, and consumer representatives.

A detailed subject index appears in the back.

This Annual Report is respectfully dedicated to the men and women of the State and Federal regulatory community who labor so unselfishly during these trying times to provide the American consumer with good service at a reasonable cost.

PART I

MEMBER AGENCIES

Introductory Statement

Part I is presented in alphabetical order, by member agencies, with Federal agencies listed first. It includes two major sections.

The first section contains the names and abbreviated biographies of the commissioners and names and titles of key staff members. An organization chart is included for most agencies. This section also contains summaries of agency receipts and expenditures, volume of proceedings, and complaint tabulations.

The second section includes each agency's history, the qualifications a person must have to hold the office of commissioner, and the grounds and procedure for the removal of a commissioner from office. It also sets forth the agency practice and procedure, staff recruitment policy, and summarizes fringe benefits.

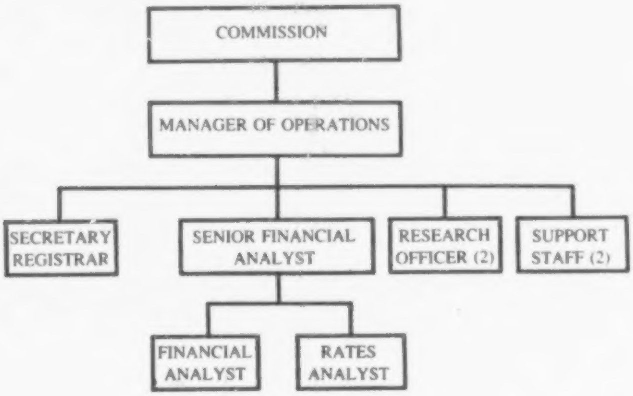
COMMISSION STAFF ORGANIZATIONAL STRUCTURE



IV. CUSTOMER COMPLAINTS AND INQUIRIES

The Telephone Act gives the Commission jurisdiction to hear complaints and inquiries from customers concerning the quality of service, rates and management policies of their telephone systems.

Telephone systems operate as monopolies in that they have an exclusive right to operate in their service territory. Since telephone systems do not experience competition from other carriers, dissatisfied customers cannot take their business elsewhere.

Customers can seek recourse with the Commission should they have a dispute with their telephone system. In 1984 the Commission received approximately 561 individual submissions and complaints and inquiries as well as five petitions containing 1,014 signatures.

ONTARIO TELEPHONE SERVICE COMMISSION
